Exhibit B
SINCE 1925, AN INDEPENDENT, NON-PROFIT ORGANIZATION DEVOTED TO
THE PRESERVATION AND DISTRIBUTION OF REFERENCE CULTURES

February 20, 1990

Ms. Judy Singleton
Cytogen Corp.
201 College Road East
Princeton, NJ 08540

Dear Ms. Singleton:

Your culture material has been received and placed in our liquid nitrogen repository. The Safe Deposit numbers and inventory are as follows:

SD#	Inventory	# Vials
1307	CYT-351	30
1308	CYT-368	30

The SD numbers have been assigned for inventory control and may be used to refer to these deposits in the future. One of the vials labeled 2MM180-M001-9M partially thawed during the transfer to our liquid nitrogen tank. It was, however, frozen but marked for future reference, and I apologize for the error.

The Safe Deposit fees are \$440/cell line (total \$880.00). This represents \$350.00 for 12 ampoules for 5 years storage and \$90.00 for the remaining 18 ampoules. You will be invoiced for this amount. Enclosed are two copies of the Safe Deposit Agreement, please sign one and return it to me.

Because cells are living entities, we cannot guarantee absolutely the viability of your culture during storage in our liquid nitrogen facility. However, we will apply all of our knowledge to assure its safekeeping. Thank you in advance for your cooperation.

Sincerely,

Charles K. Mills
Head, Applied Sciences
& Workshops

SAFE DEPOSIT AGREEMENT

American Type Culture Collection (ATCC) hereby establishes a safe deposit agreement with Cytogen Corporation, Princeton, New Jersey for storage of 2 cultures subject to the following terms and conditions:

1. The period of storage is for 5 years beginning 2/1/90 and ending 1/31/95.
2. The fee for this period of storage is \$880.00 for both cultures payable in February 1990.
3. This agreement is for storage of 2 cultures only (SD 1307, SD 1308) at an inventory of 30 vials of each culture. Additional material must be treated under a separate agreement.
4. These cultures are the sole property of Cytogen Corp. As such ATCC agrees to maintain these cultures in confidence, and not to use the cultures or release the cultures or any information concerning them to a third party unless authorized in writing by Cytogen Corp.
5. Withdrawal of any culture material in safe deposit, covered by this agreement, prior to the end of the agreement period will not result in a refund of any portion of the one-time fee.
6. This agreement is renegotiable at the end of the storage period.
7. Because cultures are living entities, ATCC cannot guarantee absolutely the viability of the material stored at cryogenic temperatures but will apply all of its knowledge and experience to ensure safekeeping.
8. Insurance: The determination and indemnification of economic value for strains deposited with ATCC for safekeeping remain the sole responsibility of the depositor. As such, ATCC arbitrarily assigns a value of \$1.00 per culture for insurance purposes.

The undersigned hereby agree to and accept all terms and conditions in this agreement.
